## Important notice

Parking assist systems help to provide assistance when reversing and parking. Driving skills, such as slowing down, use of mirrors etc. is always essential.

1. This unit is for vehicles with 12 V DC only.
2. Unit should be installed by a professional auto technician.
3. Route wiring harness away from heat sources and electrical components.
4. It is strongly recommended to check the position of the sensors before the actual drilling of the holes.
5. Perform a test after installation.

## Disclaimer

The parking assist system is designed as a driver assistance device, and should not be used as a substitute for safe parking practices. The area into which the vehicle is to be reversed must be constantly visually monitored while parking.

The manufacturer and its distributors do not guarantee or assume liability for collisions or damages while reversing your vehicle.

## Key features

- 4 front sensor system
- Buzzer can be upgraded to LED/LCD displays
- Can also work as a 2 -sensor system
- Self-test function
- Anti-false alert technology
- All weather design

## Specifications

```
Operating voltage: 9~16V DC
Operating current: <250mA
Detection range: }0.3\textrm{cm}~0.9\textrm{cm}/1.0\textrm{ft}~3.0\textrm{ft
Buzzer SPL: 70~90dB
ECU:
Operating temp: }\quad-4\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{0}{}{\circ}\textrm{C}/-4\mp@subsup{0}{}{\circ}\textrm{F}~+17\mp@subsup{6}{}{\circ}\textrm{F
Storage temp: }\quad-4\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{5}{}{\circ}\textrm{C}/-4\mp@subsup{0}{}{\circ}\textrm{F}~+18\mp@subsup{5}{}{\circ}\textrm{F
LCD:
Operating temp: }\quad-2\mp@subsup{0}{}{\circ}\textrm{C}~+7\mp@subsup{0}{}{\circ}\textrm{C}/-\mp@subsup{4}{}{\circ}\textrm{F}~+15\mp@subsup{8}{}{\circ}\textrm{F
Storage temp: }\quad-3\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{0}{}{\circ}\textrm{C}/-2\mp@subsup{2}{}{\circ}\textrm{F}~+17\mp@subsup{6}{}{\circ}\textrm{F
LED:
Operating temp: }\quad-4\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{0}{}{\circ}\textrm{C}/-4\mp@subsup{0}{}{\circ}\textrm{F}~+17\mp@subsup{6}{}{\circ}\textrm{F
Storage temp: }\quad-4\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{5}{}{\circ}\textrm{C}/-4\mp@subsup{0}{}{\circ}\textrm{F}~+18\mp@subsup{5}{}{\circ}\textrm{F
Buzzer:
Operating temp: }\quad-4\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{0}{}{\circ}\textrm{C}/-4\mp@subsup{0}{}{\circ}\textrm{F}~+17\mp@subsup{6}{}{\circ}\textrm{F
Storage temp: }\quad-4\mp@subsup{0}{}{\circ}\textrm{C}~+8\mp@subsup{5}{}{\circ}\textrm{C}/-4\mp@subsup{0}{}{\circ}\textrm{F}~+18\mp@subsup{5}{}{\circ}\textrm{F
```

## Buzzer

## LED display

Once ACC ON and reverse gear is selected, press "Volume" button to adjust the volume level (3 volume levels).

When the obstacle distance is less than 0.3 m , the volume level will be in max volume automatically.

## Activated by pressing footbrake

The system is activated by pressing the footbrake.
When you press the footbrake and release it the system will continue to work for some time.

Continue to work for 5 seconds (Default setting)
Recommendation for AT vehicles

Continue to work for 20 seconds Recommendation for MT vehicles

## Sensor installation height

## 2 / 4-sensor automatic recognition

This 4-sensor system can be used as a 2 -sensor system.
This has to be done by connecting the 2 central sensors (F\&G) or 2 outside sensors (E\&H).

## Self-test function

Once ACC on, the system will test all rear sensors automatically.
If all sensors are working properly, the buzzer/display will beep once for indication.
If a damaged or defective sensor is detected, then the system will beep 3 times for alarm.

## For buzzer

All sensors are working property Damaged or defective sensor is detected.

## For display

All sensors are working property

Damaged or defective sensor is detected.

Notes:

- Beep 3 times for alarm
- Other proper sensors will keep working after the alarm
- No. of sensor damaged/defective (E1~E4) will be shown on the display together with the corresponding LED lights on for showing which sensor(s) is(are)damaged/defective.
- For E2: The system will not alarm when sensors (F\&G) are damaged/defective as it will work as 2 -sensor system automatically.

## Attention

False detection may occur in the following situations:

- After installation, please fully test the system before use.
- Heavy rain, dirty or damaged sensors may result in false alarm occasionally.
- Ensure that the self-test procedure is completed and all sensors are functioning before using the system.

Do not wash the sensor with a pressure washer or scrub them forcibly.

Please wash car with lowpressure water.

Please melt the ice with warm water when the sensors are covered by ice.

Please clean the sensors with cloth or low-pressure water when the sensors are covered by dirt or snow.

## Packing list

※ The actual sensor may vary from the image shown above

## Installation tools

Notes:

1. For 2 -sensor system, recommended to install 2 sensors on position either E\&H or F\&G for the best performance.
2. On some vehicles, due to the number plates location or bumper design, the distance between the centre of two sensors (L2) will be greater, i.e. $L 2>60 \mathrm{~cm}$. The kit will still function, however the detection of narrow objects i.e. posts will be reduced.

## Change of sensor cover

7

## Wiring diagram

Note: 4 sensors display range: $0.3 \mathrm{~m} \sim 0.9 \mathrm{~m} / 1.0 \mathrm{ft} \sim 3.0 \mathrm{ft}$

Note: E\&H sensors display range: $0.3 \mathrm{~m} \sim 0.7 \mathrm{~m} / 1.0 \mathrm{ft} \sim 2.3 \mathrm{ft}$

## Function test

Note: G\&F sensors display range: $0.3 \mathrm{~m} \sim 0.9 \mathrm{~m} / 1.0 \mathrm{ft} \sim 3.0 \mathrm{ft}$

## Troubleshooting

1. After installation, the buzzer/display doesn't work.

- Make sure the wires connected properly.
- Plug the certified sensors into the ECU and performing a functional test again
